The following information is contained in this volume:

FINANCIAL STATISTICS—CANADIAN GOVERNMENTS

Municipal - Provincial - Federal

EIGHTEENTH YEAR OF PUBLICATION—1937 ISSUE

FOREWORD

The Institute presents herewith the Eighteenth issue of Financial Statistics—Canadian Governments. The figures given herein are comparable with those given in previous issues of the "Red Book." We believe this to be a very important feature, inasmuch as it is possible, with such figures taken over a term of years, to get a good idea of the trend of financial affairs in any given municipality.

The publication is issued in loose leaf form, usually in two sections, each section being published as soon as the information is as complete as it is deemed possible to make it. The first section covers all the urban municipalities with a population of 10,000 or over and those with a population 2,000 to 10,000, with the exception of those in the Province of Quebec. The second section covers the remaining urban municipalities with a population of 400 or more, as well as larger rural municipalities with substantial bond issues outstanding. It also includes a page devoted to the Dominion and the Provinces. Supplementary information covering tax collections, etc., is issued from time to time during the year.

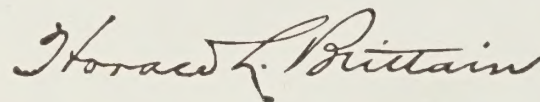

In recent years much of the information in the latter section is at a date a year later than that which the Edition is expected to cover. For instance, while the 1936 Edition is presumed in general to give information as at Dec. 31st, 1935, it will be seen by turning to pages 24 to 28, pages 32 to 42 and page 49 of that edition that much of it is at Dec. 31st, 1936.

The Institute wishes to point out again that the "standards" used herein are not infallible guides in determining the financial strength or weakness of a municipality. They should be used merely as "indications" of the desirability of more detailed enquiry before arriving at final conclusions. The readiness with which tax demands are met is one of the most sensitive and reliable indicators of the credit rating of a municipality. That this is true has been illustrated by the fact that the majority of those Canadian municipalities which have been in financial difficulties have given warning of conditions through their heavy tax arrears. It is advisable, however, when examining tax arrears, to consider also bank loans outstanding for current purposes, as sometimes sufficient allowance is made when striking the tax rate to offset taxes uncollected. Such a condition is usually indicated when tax arrears figures are comparatively high, but current borrowings only nominal. Some municipalities may exceed the "standards" considerably and still be perfectly sound, and all the elements affecting the financial capacity of the municipality under examination must be kept in mind.

It is encouraging to note further improvement in tax collections in a great many municipalities in 1936. Also a considerable number have been able to improve their debt position. These municipalities, by thus improving their credit rating, create a basis of confidence which in turn enables them to obtain any capital needed at a low rate of interest.

The Institute wishes to express its appreciation of the excellent co-operation received from Municipal and School Treasurers and other officials in the supplying of these data. It also wishes to thank its subscribers for their continued support.

(X) These amounts are in some instances only approximate. They include loans on account of Hydro, Housing, Railways, Telephones, Rural Credits, Storage Dams, etc.

¹ These are the 1936 figures, per capitas of which are listed in Tax Conference Reports Nos. 158, 159. They are compiled as nearly as possible on a comparable basis, and do not coincide exactly with totals in the public accounts. They do not include capital revenues or expenditures, nor those of self-supporting public utilities, but do include expenditures on direct relief whether or not these were capitalized.

² Not borne directly by the people of the Province. To arrive at the per capita expenditure from local sources, this must be deducted from total per capitas.

³ Treasury bills of \$150,000,000 included in debenture debt.

⁴ Including railway and steamship deficits amounting to \$43,137,772 or \$3.92 per capita. This covers only interest on debt in the hands of the public.

⁵ Includes \$499,500 housing debt.

⁶ Includes \$572,000 housing debt.

⁷ Not including \$3,000,000 Canadian Northern Rly. guarantee. In addition, Province has outstanding treasury bills of \$7,062,988 with the chartered banks in connection with the closing of the Provincial Savings Office, against which there are pledged securities amounting to \$7,155,047 par value, the proceeds of which upon realization are to apply to reduction of said bills.

⁸ Includes \$20,160,000 P.G.E. Rly. guaranteed stock and bonds, interest on which is borne by the Province. Now regarded as a direct debt.

⁹ Includes \$31,345,080 treasury bills to Dominion.

¹⁰ Includes \$40,157,523 for railways controlled by Dominion Government; also \$7,033,333 for Vancouver and District Joint Sewerage and Drainage Board, against which there is a sinking fund of \$1,033,086.

¹¹ In addition, demand deposits, Province of Ontario Savings Office, \$37,688,670.

¹² In addition, \$8,146,799 savings certificates outstanding.

¹³ After deducting \$1,760,339 sinking funds against guarantees. Does not include \$32,233,658 for railways either controlled by the Dominion Government or assumed jointly by C.N.R. and C.P.R.

¹⁴ Public accounts state revenues exclude uncollected receivables, but expenditure includes accounts payable. Debt Service shows a reduction, as interest not paid at contracted rates. Sinking fund payments reduced over \$700,000.

¹⁵ Not including \$27,392,911 guarantee for railways controlled by Dominion Government.

¹⁶ If the \$2,277,461 turned over by Ontario to municipalities which formerly collected income tax were included, both these figures would be increased by that amount, and the per capitas by 62 cents.

¹⁸ Includes \$1,509,688 to Dominion *re* workmen's dwellings.

¹⁹ Not including promises to pay various institutions annual amounts over definite terms, to be applied in payment of bonds and interest thereon, aggregating \$15,893,048.

^h Housing.^x Approximate.¹ Under Montreal Metropolitan Commission.³ Debt consolidated.

† Information as at June 30th, 1937.

^v At asset value. Debt not reported.^y Including sewers.⁵ Includes electric light.⁶ Not including share of debt issued by Montreal Protestant Central School Board.

¶ As at June 30th, 1936. School taxes, debt and sinking funds are included with municipal figures only in order to make possible a general comparison with towns of other provinces. The fiscal year, and in some cases the boundaries of school and municipal districts, do not coincide. They are also usually administered by separate boards. For tax arrears of schools, see page 26.

†† Includes combined Pointe Claire and Beaconsfield Protestant school districts.

* Information as at Dec. 31st, 1937.

¹ As county rates need not be paid until Dec. 20th, after which date interest is charged, it frequently happens that a considerable amount of taxes unpaid at Dec. 31st may be paid at a date early in the next year. Unless otherwise noted, taxes remaining uncollected are all current.³ At assessor's value. This property is liable for taxation by the township, village or town within whose limits it lies.⁴ These taxes are levied on the various municipalities within the county, and not directly on individuals.⁵ As far as can be ascertained, none of these debts are for public utilities.⁶ Area, population and assessment do not include municipalities separate from the county.⁷ Standards used for urban municipalities do not apply, so figures have not been put on a per capita basis.⁸ Subsidy from Ontario on 1937 county highway expenditure will more than offset this amount.⁹ In addition, about \$450,000 guaranteed debt.¹¹ In addition, guaranteed debt of \$113,924.¹³ Of this, \$2,507 is 1936 levy.¹⁵ Guaranteed debt about \$4,000,000.¹⁶ Offset by accounts receivable, Province of Ontario and City of Toronto.¹⁷ Guaranteed debt, \$1,715,966.¹⁹ Offset by credits due from Province.²⁰ As shown in the public accounts, Province of Ontario, March 31st, 1937.²¹ Also guaranteed debt of approximately \$170,000.¹⁰ In addition, guaranteed debt of \$67,496.¹² Offset by subsidy due from Province.¹⁴ Of this, \$54,377 is 1936 levy.¹⁸ Guaranteed debt, \$200,000.²² In addition, guaranteed debt of \$227,821.

CITIZENS' RESEARCH INSTITUTE OF CANADA

137 WELLINGTON ST. WEST, TORONTO.

Financial Statistics - Canadian Governments, Service.

Figures of tax levy and tax collections for part of the year 1937 compared with a corresponding period in 1936 are herewith shown for a considerable number of the larger urban or suburban municipalities in Canada. This is an annual tabulation of the Institute, made with a view to keeping closely in touch with that most important and reliable indicator of the trend of financial affairs in a municipality, namely the readiness with which tax demands are met.

In studying these figures the following facts should be kept in mind:

- (a) Figures so far as possible are gross, that is, before deduction of discounts, allowances or reserves. Not all of the figures may be on exactly the same basis as the final figures published in the "Red Book."
- (b) Percentages between municipalities are not strictly comparable, since dates of tax collection differ widely and the portion of the year covered also differs in some instances.
- (c) Percentages of collection of the same municipality are not always comparable for the same reason.

Keeping these facts in mind, however, the figures in general show:

- (1) That the trend of increased collection of current levy shown first in 1934, after four years of decreased collections, has continued through 1935, 1936, and to date through 1937. In 1937, 97 of the 116 municipalities listed had collected an increased percentage of current levy at the reported date, compared with 1936.
- (2) That the collection of arrears of taxes continues to increase in general although at a modified pace, indicating the possibility, in many instances, that part of the amount is, under existing conditions, uncollectible and should be so recognized. Many municipalities have set up, or are setting up, reserves for this purpose. While 72 of the 111 municipalities reporting this item had better collection of arrears at the reported date in 1937 compared with 1936, yet 30 of these showing such improvement in the percentage of current levy collected showed a decrease in percentage of arrears collected.
- (3) 73 of the municipalities reporting have been able to reduce, in most cases slightly, the amount of tax levy in 1937 compared with 1936.
- (4) The trend toward collection through a greater number of installments continues.

The Institute wishes to acknowledge with thanks the prompt and kind co-operation of municipal officials in supplying these data. Only the knowledge that such information is important and is of interest, not only to holders of municipal securities, but also to municipal officials, administrators, and taxpayers, justifies, the Institute feels, the asking of such information from officials already almost overwhelmed with questionnaires of various kinds.

Financial Statistics - Canadian Governments, Service.

Some few years ago the Institute began the practice of collecting and compiling preliminary information on tax collections and bank loans for the larger urban municipalities in Canada as soon as possible after the close of the calendar year, which is the close of the fiscal year for the majority of municipalities in Canada. This was done with the idea, not only of giving up-to-date information to those taking the Institute's statistical service, but also in order to relieve municipal officials to some extent from the need for answering numerous enquiries on these points. The Institute has only been able to do this through the kind co-operation of the municipal officials. The Institute feels that it is a worthwhile service and presents herewith similar information for the year 1937.

These figures cover 120 municipalities urban in character with a population of 2,000 or upwards. It should be borne in mind:

- (1) that these are preliminary figures and that final figures after audit may be different in minor respects;
- (2) that figures of total uncollected taxes are gross in most cases and in some instances contain as well tax sale lands, etc. held by the municipality. A check on this point can be made by readers by referring to corresponding figures of taxes uncollected, tax sale lands, etc. shown in the 1937 Edition of the "Red Book," i.e. figures at December 31st, 1936.

It is of interest to note:

- (a) That in 72 of the 120 municipalities listed total tax collections, current and arrears, exceeded the current levy;
- (b) That 14 of the 120 municipalities listed collected 90% or over of the current levy during the 1937 fiscal year; 56 collected between 80 and 90%; 27 between 70 and 80%; 17 between 60 and 70%; 5 between 50 and 60% and 1 under 50%;
- (c) That of the six under 60%, 4 were situated in Saskatchewan affected by drought conditions;
- (d) That in the municipalities listed for which similar preliminary information was obtained at December 31st, 1936, 64 out of 85 collected a higher percentage of their current levy in 1937 than in 1936, and in 41 of these 85 municipalities the percentage of total collection, current and arrears, was higher in 1937 than in 1936;
- (e) That on the total for all the municipalities listed there was a collection of 82.17% of the current levy during the year while total collections, current and arrears, represent 102.44% of the levy.

These figures follow the trend forecast by the Institute in September 1937, namely that generally collections of current revenue in 1937 would show an increase over 1936, but that due in some cases to the smaller amount of arrears to be collected and in many to the more frozen nature of the arrears, total collections including arrears would tend to decrease slightly. It is possible that 1938 will see a further development of this latter trend.

February 17th, 1938.
